

WASTEWATER - CITY OF BUSSELLTON

NOTICE OF PROPOSAL TO CONSTRUCT DN250 SEWER PRESSURE MAIN AND DN375 GRAVITY SEWER

To provide for the disposal of sewage in the City of Bussellton, the Water Corporation proposes to construct the following works:

- A new nominal diameter 250mm pressure main and a new nominal diameter 375mm gravity sewer diversion between existing nominal diameter 200mm pressure main (located at the junction of Harris Road and Cammillert Street) and proposed discharge Manhole 1144 (located at the junction of Peel Terrace and Edwards Street), approximately 680m long, complete with all fittings.

The proposed works are scheduled to commence on the _____ and will be completed on the _____.

Construction of the proposed pressure main will predominantly be by trenchless technologies along Peel Terrace to minimise the effect on the existing parking bays and road, however it is proposed that open trench excavation will be used along Cammillert Street and in the downstream section connecting to the discharge manhole. All excavations will be backfilled and restored.

A copy of this Notice of Proposal (referred to as E70-0-1) is available for viewing, during office hours, at the Water Corporation's head office, John Tonkin Water Centre, 629 Newcastle Street, Leederville and at 61 Victoria Street, Bunbury.

Further project information may also be obtained by contacting the Design Manager, Mr Peter McCreery, telephone (08) 9791 0442.

Objections to the proposed works will be considered if lodged in writing, addressed to the Project Manager, Mr Peter McCreery, on P.O. Box 100, Leederville 6902, before the close of business on the _____.
