The Proposal involves the clearing of a 30 m wide corridor across 266 km, which will result in a total construction footprint of up to 881 ha (including turn-around points, turkey nest dams, access and a construction camp), representing mostly temporary construction space. The permanent development footprint will be 133 ha after post-construction rehabilitation has been completed. The permanent footprint is required for permanent access track along the corridor (refer to <b>Section 2.2</b> of the Referral Supporting Document).
